Aim of the event

In the recent years, spinal surgery has been characterized by two main streams of innovation: an increased knowledge of spino-pelvic balance with its clinical and surgical implications and the development of new intraoperative surgical tools (CT based navigation, robotics). This live surgery event will be predominantly focused on these subjects.

We accepted with enthusiasm the invitation by SICV&GIS to give our contribution to their new educational program. It is largely recognized that the Italian Orthopaedic Surgery has been and still is one of the leading spinal surgery societies in the world. Italian Neurosurgery has recently achieved an increasingly important place in this field. The spirit of collaboration between SICV&GIS and SINch and its Spinal Section is becoming more and more intense and effective.

This first event is directed towards a closer cooperation between orthopaedic surgeons and neurosurgeons in spinal surgery.

Besides the scientific program, we hope this meeting will make easier for all of us to share our common interests and experiences in a spirit of friendship, while promoting a closer personal and mutual knowledge.

We wish to thank once again the SICV&GIS colleagues and President Marco Crostelli MD, in the hope to repeat this survey on advanced spinal surgery technology at Humanitas Hospital in the near future.

Maurizio Fornari, MD

Gualtiero Innocenzi, MD

I have always believed that the main goal of a scientific society is to promote the cultural development of its membership and offer continuing education and interdisciplinary knowledge.

Ever since my appointment as President of SICV&GIS I have pursued this goal and decided to organize monothematic educational events which, as a tribute to our ancient society journal, I have given the name of "Advanced Spinal Pathology educational events" - Giornate di Progresso in Patologia Vertebrale.

The proposal was immediately accepted by the Board together with the topics proposed for the first two-day workshop.

The most interesting topics I could identify for these events are related to Navigation in Spinal Surgery and therefore I decided to ask Maurizio Fornari and Gualtiero Innocenzi, two of the best qualified "experts" in this area, to manage the Educational on behalf of the SICV&GIS Society. I am sure they will accomplish the task in the best possible way.

Best regards and looking forward to seeing all of you in Milan!

Marco Crostelli
President of SICV & GIS
